

# ACME Corp Annual Report 2023

*Filed with SEC | Confidential Distribution*

## Executive Summary

ACME Corp delivered record results in fiscal year 2023, achieving total revenue of \$182.4M, representing 24% year-over-year growth. EBITDA margins improved to 34%, driven by operational leverage and disciplined cost management. The company exited 2023 with \$84.3M in cash, no debt, and a robust pipeline entering 2024.

## Revenue Breakdown

Product Sales contributed \$108.7M (60%), Professional Services \$46.5M (25%), and Licensing \$27.2M (15%). EMEA revenue grew 38% YoY, outpacing AMER at 19%. The top 10 customers represent 28% of total revenue, down from 34% in 2022, indicating healthy customer diversification.

## Operating Expenses

Total OpEx was \$120.5M. R&D; investment increased 31% to \$38.2M, reflecting commitment to platform innovation. Sales & Marketing was \$32.8M, with CAC payback improving to 14 months. G&A; held flat at \$24.1M despite headcount growth, demonstrating operating efficiency.

## Risk Factors

Key risks include foreign exchange exposure in EMEA, dependency on cloud providers (AWS represents 78% of infrastructure spend), and ongoing regulatory scrutiny under GDPR and emerging AI legislation. Management has implemented hedging strategies and multi-cloud initiatives to mitigate these exposures.

## Outlook 2024

Management expects revenue between \$215M-\$230M (18-26% growth), with EBITDA margin expansion to 36-38%. Capital expenditure plans of \$14M support infrastructure scale, and we expect to add 120 net new employees, primarily in engineering and customer success roles.
